

Needs Assessment

Your local NASC will talk with you about your health and support needs and the types of care available. They will confirm whether they believe you need long-term residential care.

Financial Assessment

If your needs assessment shows you do need this type of care, the NASC will give you a Residential Care Subsidy Application Form to send to Work and Income.

Qualify for Subsidy

If your financial means are below the Government-set asset threshold you will qualify for full or partial Government Funding.

Moving in

You'll complete an admission agreement with us which will include the details about the Government subsidy amount you receive and whether there is any additional amount you will need to pay. If you wish to have a 'premium' room or additional services these will be included in the agreement.

Do not qualify for Subsidy

If your financial means are above the asset threshold you will need to pay the cost of the rest home care - this is called the Maximum Contribution and is around \$140 - \$175 per day.

Moving in

You can still move in even if you don't qualify for the Government subsidy, however you will need to pay the full cost of your care privately. You may also choose to have a 'premium' room or additional services.
